

## Project Overview

Duneland School Corporation has embarked on a data journey to improve the ways in which they serve their students for College and Career readiness. As part of this journey they have partnered with several groups to implement Ed-Fi and to leverage interoperable solutions to power their Salesforce based strategies for personalized student support. In this session you will see the real work involved and products delivered and partners who each contributed to the pipeline. Duneland partnered with the INsite Collaborative, Link, Servio, and Economic Mobility systems to bring their vision to life.

Link's role within this consortium is to facilitate the integration of data from Duneland's information systems, specifically Duneland's SIS and Ed-Fi to the Salesforce platform. Through this project and partnership Link has built connectivity to the Ed-Fi Platform and this is generally available to all Link customers.

## Link Project Details

Below are links to the Link platform where the different processes are built to move data from edfi/skyward or sftp to the Salesforce platform.

- School Account: <https://app.link.io/a/10681/tf/15491> (EdFi)
  - EdFi
    - `path: api/v2.0/{{env.vars.APIYear}}/schools`
    - `version: v2.4.0`
  - Salesforce
    - `Write to SF Object: Account`
- Term: <https://app.link.io/a/10681/tf/15554> (EdFi)
  - EdFi
    - `path: api/v2.0/{{env.vars.APIYear}}/sessions`
    - `version: v2.4.0`
    - `path: api/v2.0/{{env.vars.APIYear}}/gradingPeriods`
    - `version: v2.4.0`
  - Salesforce
    - `Write to SF Object: hed__Term__c`
- Parent Account: <https://app.link.io/a/10681/tf/16128> (Skyward)
  - Skyward

- url: '{{env.vars.skywardApiURL}}/API/v1/guardians'
  - Salesforce
    - Write to SF Object: Account
- Student Contact: <https://app.lingk.io/a/10681/tf/15501> (Skyward/Edfi)
  - Skyward
    - url: '{{env.vars.skywardApiURL}}/API/v1/students'
  - Edfi
    - path: api/v2.0/{{env.vars.APIYear}}/students
