

# Ed-Fi Technical Suite Version Matrix

## Overview

Ed-Fi technology is organized into Technical Suites that represent a generation of technology products that share a data model and are designed to work together. This page provides a reference to the Technical Suites and their compatibility with specific product and service versions. Links are provided to the most relevant documentation (which in turn provide links to code or other technical resources).

- Out-of-support pre-release versions are not listed in the matrix. For pre-release versions of standards and tools, only the most recent version is ever under support, and upon final publication of the standard or tool all pre-release versions go out of support.
- In general, agencies are advised to update to the latest versions of products. Please consult version release notes for details to ensure compatibility to local requirements.
