

What's New in v3.0

This documentation provides a summary overview of the major improvements, updates, enhancements, fixes, and changes in made in the Ed-Fi Dashboards v3.0. The [Release Notes](#) section of this documentation has a complete list of changes.

This dashboard release delivers compatibility with the [Ed-Fi ODS / API v3.2](#) along with a few minor bug fixes.

ODS v3.2 Compatibility

This version of the Ed-Fi Dashboards is compatible with the Ed-Fi ODS / API v3.2 release, which includes significant changes included in the [Ed-Fi Data Standard v3.1](#). The notable changes that impact the Dashboards include:

- A change to the natural key structure of the Section and Grading Period entities to remove volatility
- Removal of enumerations from the model
- Expansion of and changes to the Calendar model
- Changes in the structure of student characteristics
- Changes in the Staff Leave Event and Absence Event entities

The full list of improvements and bug fixes for the Ed-Fi Dashboards v3.0 Tech Preview are cataloged in the [Release Notes](#).

Business Rule Updates

In order to achieve compatibility and minimize changes to the Dashboard presentation layer, a few business rules were updated to make clear assumptions in the dashboard code. In some of these cases, the model adds flexibility that will require an in-depth review and code updates to realize the benefits. As you review the changed business rules, note the dashboard version to which the rule applies.

Key	Summary	Status
MET-1019	Student Grades and Credits - Course List	SCHEDULED FOR RELEASE

Backward Compatibility & Legacy Support

The Ed-Fi Dashboards v3.0 are not backward compatible with previous versions of the code base. The dashboard code contains several structural and schema changes to support the Ed-Fi ODS / API v3.2 and are not compatible with previous versions.

Implementers of Dashboards v3.0 should note that this release is not backward compatible with:

- Versions of the Ed-Fi ODS / API prior to v3.1
- Legacy SSIS dashboard packages
