

What's New

This documentation serves as an introduction to the features and significant changes made for the Ed-Fi ODS / API v3.2.

This release is aligned to [Ed-Fi Data Standard v3.1](#). The v3.2 release is a feature release, meaning there are no breaking data standard changes accompanying this release. However, the release does have breaking changes to build and deployment pipelines, plus MetaEd language changes of which platform hosts should be aware. See [What's New in v3.2](#) for details.

Audience

This documentation is for technical professionals who work with educational data, including business analysts, database administrators, and software developers.

Prerequisites

The Ed-Fi ODS / API technology is free to license and use. Access to the Ed-Fi repository on GitHub is required to download the Ed-Fi ODS / API technical material. Click [here](#) for more information.
