Getting Started

This documentation describes the concepts and techniques necessary for a technical professional to understand and leverage the MappingEDU system.

Audience

This documentation is for technical professionals who work with educational data systems, primarily data analysts, system integrators, subject matter experts, and ETL developers. Technology leaders may find some of the content herein useful.

Prerequisites

To gain the most benefit from this information, the reader should already be familiar with the following knowledge areas:

- Ed-Fi technology, see [www.ed-fi.org](http://www.ed-fi.org)
- Data mapping and data integration concepts
- ETL concepts
