## Business Rules

### Business Rule Tests

SpecFlow tests for the District Teacher Education metric business rules can be found [here](#).

Summary	Description	Testing Location	Key
<a href="#">Active Teacher</a>	A staff person in a school with StaffCategory of Teacher whose association to the school and association to a course section in the school is active.		MET-47
<a href="#">Attendance Metric Context</a>	For container-level metrics, the context displays the most recent attendance event date included in the metric calculation. The format for the context should be "Through (Attendance events max date)". <b>Note:</b> The attendance event types included in respective metric calculations are different for students and teachers.		MET-290
<a href="#">District - Difference from Goal</a>	For a district with a metric value calculated, Difference from Goal = District goal - Metric value		MET-260
<a href="#">District Teacher Education Rate - Bachelor's or Higher</a>	Percent of teachers who have either a bachelor's, master's, or doctorate degree. Percentage of teachers with bachelor's or higher degree = (Active Teachers with a bachelor's, master's, or doctorate degree in the district) / Total number of Active Teachers in the district.		MET-83
<a href="#">District Teacher Education Rate - Master's or Doctorate</a>	Percent of active teachers who have either a master's or doctorate degree. Percentage of teachers with master's or doctorate degree = (Active Teachers with a master's or doctorate degree in the district) / Total number of Active Teachers in the district.		MET-351

Metric Not Calculated when Denominator is Zero	For metric calculations that produce a ratio, if the denominator is 0, then the metric is not calculated.	MET-30
Metric State - Positive Trend - District	If the metric value is greater than or equal to the district goal, the metric state should be "1-Good". Otherwise, it should be "3-Bad".  If no school goal is set, the value will be compared against the metric default value.	MET-204
Metric Status - Positive Trend - District	If the metric value is greater than or equal to the district metric goal, the status should be green. Otherwise, it should be red.	MET-21
School Attainment - District	School Attainment = Total number of schools that met school goal / Total number of schools in district with a metric value.	MET-257
