

Ed-Fi ODS/API Cloud Deployment for AWS (Suite 3)

Description

The Ed-Fi ODS / API deployment for Amazon Web Services consists of a set of Cloud Formation Templates and Lambda functions that make it easy to deploying a new copy of the Ed-Fi ODS / API to an Amazon Web Services tenant. The goal of these tools is to reduce the amount of time and effort needed to get a new instance of an Ed-Fi ODS/API up and running. This solution enables you to deploy the ODS / API on either PostgreSQL or Microsoft SQL Server.

At a Glance

Generation: Tech Suite 3
For: ODS/API v3.4.x
