

Data Handbook for the Core XSD v2.0

Description

The data handbook for the Core XML Schema v2.0 describes all of the core schema elements and their properties using non-technical language, a great place to start exploring the Ed-Fi Data Standard.

An example entry is shown below.

ClassPeriod Entity

diagram

The diagram shows a class hierarchy where **ClassPeriod** extends **ComplexObjectType (intension)**. **ComplexObjectType** has an attribute **id** with the description: "The XML ID associated with the complex object." **ClassPeriod** has its own description: "This entity represents the designation of a regularly scheduled series of class meetings at designated times and days of the week." It is associated with **SchoolReference** (description: "Associates the ClassPeriod to the school.") and **ClassPeriodName** (description: "An indication of the portion of a typical daily session in which students receive instruction in a specified subject (e.g., meeting with period, block period, or AB scheduled).").

namespace `http://ed-fi.org/0210`

type extension of `ComplexObjectType`

properties base `ComplexObjectType`

children `SchoolReference` `ClassPeriodName`

attributes	Name	Type	Use	Default	Fixed	Annotation
<code>id</code>		<code>xs:ID</code>				documentation The XML ID associated with the complex object.

annotation

documentation

This entity represents the designation of a regularly scheduled series of class meetings at designated times and days of the week.
