Feedback

Community feedback is critical to the standards development process, and the Alliance welcomes feedback from anyone.

The primary mechanism for feedback is via the Ed-Fi Alliance general project in the Ed-Fi Tracker. Licensees can [submit working draft feedback by clicking this link](#) (login required). Licensees and the general public can view existing feedback here: <https://tracker.ed-fi.org/projects/EDFI/> (login not required). When entering a feedback ticket, please reference the Working Draft number, change, or specific fix on which you are commenting, if applicable.

If you need an account for the Tracker, please go to <http://www.ed-fi.org/access-request/> (note the [Technical Community Guidelines](#) if you are curious about what Ed-Fi Alliance services you can access).

Community discussion is also welcome via [Ed-Fi Slack](#).
