

EADM Session Notes

2:15 PM - 3:15 PM	<p>EADM Session</p> <p>Las Palmas C</p> <p>The EADM collaborative is building shared analytics off the Ed-Fi model. Join this session to learn about the EADM project and resources.</p>
-------------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

These broad session notes attempt to capture the spirit of the discussion and should not be interpreted as a transcript. Although Ed-Fi Alliance staff were involved in capturing these observations, the notes below should not be construed as official, complete, or 100% accurate.

- EADM Overview
 - Data Governance Collaborative (DGC) was formed to continue work of Data Systems Working Group (DSWG)
 - Helped to address voids in market with assessment data and interop
 - DGC Member Organization - 12+ school district members
 - Group found no business architecture found for assessment
 - Group also working on data and tech and how to apply that to business and operations
 - Group working on a system of assessment, not just tech, but overall implementation and governance within a district
 - Essential assessment questions from Zachman framework - what, why, who, where
- Barriers
 - Scale
 - From source to loading data
 - Different format every year
 - No carrot or stick incentive for vendor
 - Data integrity
 - Huge spend on assessment
 - Purpose or intent of assessment
 - Why are we doing this; don't know what we don't know
 - Shadow IT because of the disconnect
- Opportunities
 - Repeat successes
 - Behavior changes to move needle
 - Create meaning incentive
 - Work with assessment and IT group
- Use case and Visuals
 - Track 1
 - Assessment task force - Assembling cross functional groups, beyond standard assessment and IT teams
 - Assessment inventory - vendor, content, what type of data, times/dates
 - Gap analysis - requirements for Ed-Fi model
 - Future Road Map - governance and sustainability
 - Track 2
 - Assessment task force - Assembling cross functional groups, beyond standard assessment and IT teams
 - +++
 - Use Cases - 8 core questions to find priority cases to visualize assessment data - from Ed-Fi - what could this look like?
 - Data Elements - worksheet from use cases extracting out important elements to drive data visualization
 - Reporting assessments
 - Visuals piloted in PowerBI - proof of concept, working reports to analyze data, both student level and aggregate
 - Creating a "Cookbook" for training and requirements to replicate visualization work - this will be checked into the Ed-Fi Exchange
 - Assessment owners are finding new capabilities and doing more with data
 - Looking for new districts and assessment providers to join the EADM and DGC group
